

# SHOOTING CENTER RUUTIKANGAS

## Project Ruutikangas

The Ruutikangas shooting centre project started in 2012, and currently has over 30 highly experienced construction, funding, fundraising, and project coordination professionals working on the venture.

The environmental permit for the Ruutikangas project was granted in 2015. Construction work on the site will commence in 2017 with the construction of the road network. Shotgun ranges will be the first shooting lanes to be built – and practical shooting ranges, in 2019, the last. The opening ceremony will take place on Midsummer 2019.

The Ruutikangas project has been made possible by the generous support of the municipalities of Liminka and Lumijoki: they have purchased the land on which the shooting centre is being built and Liminka has also hired two full-time employees to look for public funding for the project. The budget for years 2017-2019 is approximately 11 million euros. The share of private funding has been estimated at approximately 2 million euros. You too can take part in this exciting venture – come and join us in building the largest shooting range complex in Europe!

## Become a sponsor!

Anyone interested in shooting sports can take part in the building of the largest shooting centre in Europe – that means you too! Support the Ruutikangas project and purchase a quality product – or two, three... – from our online shop! Our quality selection includes both stylish wearables and handy gadgets, all featuring the elegant Ruutikangas logo. All proceeds go to support the Ruutikangas construction project.

Project   Accommodating   Versatile   **Responsible**

The ranges feature state-of-the-art electronic scoring systems and lead recovery systems, as well as safety baffles, berms, and other safeguards that fulfil the strictest of standards.

## Ruutikangas is one of the largest shooting range projects in the world:

a modern shooting centre covering 92 hectares and featuring state-of-the-art ranges. Ruutikangas will offer professionally designed, first-class shooting ranges for all shooters, from hunters to practical shooters, whether you prefer handguns or rifles.

The ranges feature state-of-the-art electronic scoring systems and lead recovery systems, as well as safety baffles, berms, and other safeguards that fulfil the strictest of standards. A provision for an indoor shooting range will also be made. In addition to a full range of outdoor shooting ranges, the centre will include a restaurant with 400 seats, a car park for 800 vehicles, and a helicopter field – visitors, of course, also have access to all the services offered by the lively Oulu region.

Ruutikangas will be built in the municipalities of Liminka and Lumijoki, near the city of Oulu, Finland. Once completed, the centre will provide facilities for all shooting disciplines, making it possible to organise large international competitions, all the way up to world championship events. Between competitions, the centre will provide high-quality practice facilities for all shooting enthusiasts.

Ruutikangas is conveniently located. The Oulu international airport is a mere 20-minute drive away from Ruutikangas; from Oulu city centre and its hotels, the shooting centre can be reached in 30 minutes via the E4 motorway. In the Oulu region, shooting enthusiasts and their families can also enjoy a wide variety of leisure activities and visitor attractions, such as the world-famous [Liminka Bay bird sanctuary](#).

The project is coordinated by Oulun seudun ampumahilukeskus (OSAK) ry, which will also run the centre once it has been completed. The OSAK association comprises the shooting, hunting, and reservist organisations of the Oulu region and has over 3000 members.

## Frequently asked questions

If you have a question about Ruutikangas and you do not find an answer here, please do not hesitate to [contact us!](#)

**Q: Who Are The People Behind The Ruutikangas Project?**

**A:** The project is coordinated by Oulun seudun ampumahilukeskus (OSAK) ry. The OSAK association comprises the shooting, hunting, and reservist organisations of the Oulu region. The project currently has over 20 highly experienced construction, funding, fundraising, and project coordination professionals working on the venture – many of whom you can find on our [Contact page](#).

**Q: How Long Will Construction Take?**

**A:** Construction work starts in 2017 and the opening ceremony of the shooting centre has been planned for Midsummer 2019. In all, the construction process will thus take just over two years.
